

Distribution boards

Distribution boards for home automation, industry, automation systems, PLC and digital relays programming.

INSTALLATION BOARDS PRODUCTION

- Production of metal in-wall and on-wall distributors,
- Production of plastic in-wall and on-wall distributors,
- Environmental protection range IP31 – IP65

DISTRIBUTION BOARDS PRODUCTION

- Production of metal distribution boards up to 2 MVA
- First time system start and maintenance
- Environmental protection range IP31 – IP65
- System management through 17" touch screen displays

TECHNICAL DOCUMENTATION

- technical solutions for industry automation systems
- technical solutions for air-conditioning systems
- technical solutions for complex whirlpool, fountain and jacuzzi systems
- technical solutions for substations
- technical solutions for high voltage powerlines
- as build documentation
- feasibility studies and optimization studies for electricity consumption
- feasibility studies for reconstructions of installations and automation systems

We are offering PLC, digital relays and embeded PC systems programing service on your request.
